---

### Objective:

To obtain an entry-level position as a software developer.

---

### Related Experience:

*Torsh, Inc*

Job Title: Intern Software Engineer

Dates of Employment: April 2017 - August 2018

- Developed features in a large fullstack web application and separate corporate CMS website. Integrated 3rd party APIs into platform. Wrote server side CRUD methods and implementing frontend UI and UX.
  - Architected features from design mocks. Communicated with UX designer to clarify feature behavior.
  - Coordinated with other developers to complete sprints. Collaborated using version control to organize workflow. Discussed sprint progress during scrum meetings and engaged in peer reviews . Presented work during weekly demos.
  - Corresponded with other developers via Slack and Google Hangouts. Collaborated on software development projects in realtime using screenshare software.
  - Experienced with manual acceptance testing for large software releases. Automated testing experience. Tracked bugs by opening and resolving sprint cases.
  - Drafted, composed, and edited technical documentation to meet purpose and standards.
-
